

ChamberTite Entry Boot Range

The entry boot range is part of the comprehensive ChamberTite range from Forecourt Solutions.

The entry boot range is designed to alleviate the problem of water ingress into tank & dispenser sumps and other containment chambers that have pipework and duct entries. The boot provides a watertight seal to the pipe and to the chamber wall

Features & Benefits

- Waterproof Pipe and Duct Entries
- Installation on flat and round surfaces
- Fuel Compatible materials
- Nitrile rubber to BS2751
- Suitable for entries up to 15° from perpendicular
- Fully adjustable post installation
- Testable and Re-sealable

Design Concept

Each entry boot within the range is sized to provide maximum flexibility for the different pipework systems commonly used. Pipe alignment in both horizontal and vertical planes is facilitated. Boot flexibility reduces stress transfer to containment chamber walls.
